SOFTWARE ENGINEER / FINANCIAL SYSTEMS + APPLIED AI

adamruns27@gmail.com · adamruns.com · GitHub: adamruns · LinkedIn

Full-stack engineer who owns production workflows from API design to financial reconciliation. Builds reliable integrations and shared AI development tools; completed an M.S. in Computer Science with a 4.0 while working full-time.

EXPERIENCE

MedShift January 2025 - Present
Charlotte, NC
Software Engineer II (promoted February 2026)

- Built and own the Buy Side disbursement workflow, recording **\$119.6M across 1,087 funded applications** as of July 2026, including historical backfills. Replaced manual finance work with automated processing and reconciliation.
- Authored the **QuickBooks Online integration**, accounting for **\$31.0M in posted invoices** by July 2026; built financial API integrations and document-collection workflows for asset sales.
- Standardized AI-assisted development with repository-level architecture and test conventions, reusable pre-PR checks, MCP integrations, and an AI PR-review pipeline with human decision-making.
- Shipped **1,000+ merged PRs** by July 2026; contributed across **18 repositories** and reviewed **1,572 peer PRs** in the January 2025 - July 2026 reporting period.
- Diagnosed and fixed a lending-pricing defect by reconstructing affected payment schedules and validating calculations against recorded payments.

Previously Software Engineer I, January 2025 - February 2026

- Delivered lending features across Django/DRF, Vue, and TypeScript; resolved production defects and N+1 query issues to improve API performance and platform reliability.

Prisma Health / Clemson Senior Capstone August - December 2024
Clemson, SC
Senior Capstone Researcher

- Designed a REST API and synthetic healthcare datasets for Power BI nurse-workload dashboards, integrating the NASA Task Load Index; contributed to a React-based capstone website.

ScopeStack June - September 2023
Remote
Software Engineer (Contract)

- Resolved **50+ issues** in a Ruby on Rails SaaS platform; built interactive pricing calculators and onboarding documentation.

Fortis June 2022 - January 2023
Greenville, SC
Software Engineer (Intern)

- Pair-programmed Rails/JavaScript infrastructure upgrades and dependency replacements; joined client architecture and requirements discussions.

BoltAffect September 2020 - December 2021
Taylors, SC
Software Engineer

- Shipped a React Native app to both App Stores and built a barcode-driven warehouse tracking system on Linux.

EDUCATION

Clemson University **4.0 GPA**
M.S. Computer Science, Artificial Intelligence & Machine Learning May 2026
B.S. Computer Science, Palmetto Fellows Scholar December 2024

TECHNICAL SKILLS

Core: Python, TypeScript, JavaScript, SQL, Ruby; Django, DRF, Vue, React Native, Rails
Infrastructure: PostgreSQL, Redis, Celery, Docker, Linux, AWS, Git
Integrations & AI: QuickBooks Online, DocuSign, Auth0, WorkOS, Equifax, Middesk, MCP, Claude Code, Codex
